

## QUARTERLY MARKET REVIEW

---

THIRD QUARTER 2023

# Quarterly Market Review

Third quarter 2023

The 3<sup>rd</sup> quarter got off to a good start in July, extending gains achieved in the first half of the year. However, August and September both produced losses for stock and bond investors.

The culprit was a continued rise in interest rates, coupled with comments by the Fed that, despite inflationary pressures subsiding, they plan on keeping rates high for a longer period of time.

As we head towards the end of the year, the brutal attack by Hamas in Israel, and Israel's expected forceful response, has heightened tensions around the world. There are legitimate fears that this will escalate into a broader conflict. If diplomatic efforts are not successful in keeping things contained, world markets are likely to be negatively impacted. Of course, nothing is more important than the humanitarian crisis that has defined the war to date, so let's all hope that some sort of resolution can be found before too long.

As this is our last formal communication before the holiday season is upon us, we wish you and yours the very best of times, for the love of friends and family members is what truly makes the pursuit of financial gains worthwhile.

Warm regards,

Tony Reed, CPA, CFP  
President

# Global Fixed Income

## Third quarter 2023 yield curves

With the exception of the UK and Australia, interest rates generally increased across global developed markets for the quarter. In the UK, short- to intermediate-term rates decreased. In Australia, ultrashort-term rates decreased.

Realized term premiums were generally negative across global developed markets.

In Japan, ultrashort-term nominal interest rates were negative. In the UK, Germany, Canada, and Australia, the short-term segment of the yield curve was inverted.

### Changes in Yields (bps) since 06/30/2023

	1Y	5Y	10Y	20Y	30Y
US	3.4	49.2	81.2	86.5	89.4
UK	-39.4	-36.3	1.7	31.2	43.4
Germany	14.7	18.7	42.1	54.6	60.4
Japan	6.0	26.1	36.2	41.9	36.3
Canada	15.6	61.8	76.7	75.2	73.7
Australia	-11.0	20.5	42.8	47.8	49.7

# When Value Delivers

Third quarter 2023

Wes Crill, PhD, Senior Investment Director and Vice President, Dimensional Fund Advisors

The first half of 2023 marks the tenth time since 1926 that value stocks have underperformed growth stocks by more than 20 percentage points over a two-quarter period. More often than not, value has responded like the hero in an action movie, beating growth over the following four quarters in seven of the nine previous instances and averaging a cumulative outperformance of nearly 29 percentage points.

The sample size may be small, but a positive average value premium following a large negative period is not too surprising. In fact, looking at the other side of the value performance distribution, there have been 19 two-quarter periods with the value premium exceeding positive 20%. In 11 of these, value outperformance continued over the next four quarters. The average premium across all 19 was 3.6%.

It's notoriously challenging to find an indicator that consistently predicts negative value premiums. Regardless of value's recent performance, investors should expect positive value premiums going forward. That's a strong incentive for investors to maintain a disciplined stance to asset allocation, so they can capture the outperformance when value stocks deliver.

## Comeback Kid

Cumulative return difference for value minus growth in US stocks over the four quarters following two-quarter periods during which value underperformed by -20% or outperformed by +20%.
