QUARTERLY MARKET REVIEW

FOURTH QUARTER 2019

Quarterly Market Review

Fourth Quarter 2019

Welcome to the 2020's. We hope you had a safe and wonderful holiday season. Sadly, the new decade is off to a horribly tragic start, with the loss of Kobe Bryant, his daughter and the others in that accident. It's a sobering reminder of how fragile life is, and how not a single moment of our time here is assured.

On a happier note, 2019 was a terrific one for investors, as the fourth quarter provided gains for both equity and fixed income investors alike. When all was said and done, most equity indexes finished the year up over 20%, and fixed income investors enjoyed returns in the 4-8% range.

These positive results, however, have not done much to change our outlook for 2020. As we said in our 3Q19 commentary, we are decidedly cautious about the prospects for the equity markets this year. In our view, there's a good chance that a recession will hit within the next 12-18 months, if not earlier.

One could argue that much of the gains seen in the market of late have been a result of the massive tax cuts and the Fed's lowering of interest rates that followed. Yet these market stimuli have produced only modest economic growth coupled with an exploding Federal debt. Further, over the last 120 years, there has never been a longer period of time between recessions – the last one began in December, 2007.

Quarterly Market Review

(continued from page 2)

This does not mean that we are suggesting wholesale changes to long-term portfolio allocations. It has never been our belief that such attempts to time the market's movements are beneficial in the long run. However, we do think that taking small measures to implement a hedge against a marketexposed portfolio might be a good idea. Thus, we will likely be taking such action in the near-term.

Our quarterly topic at the end of this report is a discussion about the benefits of taking financial headlines that scream at you with a grain of salt, instead of allowing them to influence your decision-making process.

As always, please let us know if you would like to discuss any aspect of your portfolio with us.

Warm regards,

Vouy Reed

Tony Reed, CPA, CFP President

Tuning Out the Noise

Fourth Quarter 2019

ILLENNIUM INVESTMENT SERVICES

When faced with short-term noise, it is easy to lose sight of the potential long-term benefits of staying invested.

For investors, it can be easy to feel overwhelmed by the relentless stream of news about markets. Being bombarded with data and headlines presented as impactful to your financial well-being can evoke strong emotional responses from even the most experienced investors. Headlines from the "lost decade"¹ can help illustrate several periods that may have led market participants to question their approach.

May 1999:

Dow Jones Industrial Average Closes Above 11,000 for the First Time

March 2000:

Nasdaq Stock Exchange Index Reaches an All-Time High of 5,048

April 2000: In Less Than a Month, Nearly a Trillion Dollars of Stock Value Evaporates

October 2002: Nasdag Hits a Bear-Market Low of 1,114

September 2005: Home Prices Post Record Gains

September 2008:

Lehman Files for Bankruptcy, Merrill Is Sold

While these events are now a decade or more behind us, they can still serve as an important reminder for investors today. For many, feelings of elation or despair can accompany headlines like these. We should remember that markets can be volatile and recognize that, in the moment, doing nothing may feel paralyzing. Throughout these ups and downs, however, if one had hypothetically invested \$10,000 in US stocks in May 1999 and stayed invested, that investment would be worth approximately \$28,000 today.²

When faced with short-term noise, it is easy to lose sight of the potential long-term benefits of staying invested. While no one has a crystal ball, adopting a long-term perspective can help change how investors view market volatility and help them look beyond the headlines.

The Value of a Trusted Advisor

Part of being able to avoid giving in to emotion during periods of uncertainty is having an appropriate asset allocation that is aligned with an investor's willingness and ability to bear risk. It also helps to remember that if returns were guaranteed, you would not expect to earn a premium. Creating a portfolio investors are comfortable with, understanding that uncertainty is a part of investing, and sticking to a plan may ultimately lead to a better investment experience.

^{1.} For the US stock market, this is generally understood as the period inclusive of 1999–2009.

^{2.} In USD. As measured by the S&P 500 Index. A hypothetical portfolio of \$10,000 invested on April 30, 1999, and tracking the S&P 500 Index, would have grown to \$28,408 on March 31, 2018. However, performance of a hypothetical investment does not reflect transaction costs, taxes, or returns that any investor actually attained and may not reflect the true costs, including management fees, of an actual portfolio. Changes in any assumption may have a material impact on the hypothetical returns presented. It is not possible to invest directly in an index.

Tuning Out the Noise

(continued from page 15)

However, as with many aspects of life, we can all benefit from a bit of help in reaching our goals. The best athletes in the world work closely with a coach to increase their odds of winning, and many successful professionals rely on the assistance of a mentor or career coach to help them manage the obstacles that arise during a career. Why? They understand that the wisdom of an experienced professional, combined with the discipline to forge ahead during challenging times, can keep them on the right track. The right financial advisor can play this vital role for an investor. A financial advisor can provide the expertise, perspective, and encouragement to keep you focused on your destination and in your seat when it matters most.

A recent survey conducted by Dimensional Fund Advisors (see **Exhibit 1**) found that, along with progress towards their goals, investors place a high value on the sense of security they receive from their relationship with a financial advisor.

Having a strong relationship with an advisor can help you be better prepared to live your life through the ups and downs of the market. That's the value of discipline, perspective, and calm. That's the difference the right financial advisor makes. EXHIBIT 1

How Do You Primarily Measure the Value Received from Your Advisor?
